## MEMORANDUM

---

---

**TO:** CHAIRMAN MORAS AND FINANCE COMMITTEE

**FROM:** NICHOLAS MOSTARDO, DIRECTOR OF FINANCE

**SUBJECT:** OTHER STORMWATER UPDATES

**DATE:** 8/25/2020

**CC:** KELLY AMIDEI, VILLAGE ADMINISTRATOR

---

### Background

Concurrent with the stormwater utility fee affordability analysis, staff continue to work with NewGen and MGP to compile the billing database, which is the major Phase II deliverable. The group is meeting weekly and plans to have formal results to present to the Board in September. In the interim, staff is aware that individual Village Board Trustees would like to have the ability to lookup preliminary stormwater fees on individual properties.

### Analysis

NewGen Strategies and Solutions has compiled an offline draft lookup tool that incorporates a preliminary fee for about 90% of properties in the Village. If an individual Board member would like to utilize this tool, please contact Director Mostardo to set up a meeting or provide him a list of property addresses to reference. Since this tool is currently in draft form, it is not being made available to the public and is protected from FOIA under 5 ILCS 140/7(1)(f) until it is finalized. Once all data coding is complete, the tool will be made available for public use in Community Portal on the Village's website.

The remaining 10% of outstanding parcels are what the Village's consultants are currently focusing on coding into the database – these are the more complex parcels like townhomes or multi-PIN utility accounts. Information about the preliminary stormwater utility fee for many of these parcels is not currently available in the draft utility. This information will be updated into the utility on a rolling basis as coding is completed.

### Recommendation
