

Snap Medical Wellness

320 Peterson Rd

Sign Project Narrative:

Dear advisory board members,

On behalf of SMW, iC Signs & Graphics is seeking to install a new business identity illuminated sign at 320 Peterson Rd For Snap Medical Wellness place of business.

We are seeking approval for the provided business identity signage design plans attached to this package. Like other units within this plaza, we are seeking an internally illuminated LED channel letter sign on raceways.

Due to the outdated Plaza guidelines that are on file, there was confusion on allowances here, the plans on file from landlord originated along time ago and our outdated to today's standards and fabrication methods. There are multiply new signs at this plaza, that have been approved in past that vary from the original landlord guidelines.

We have already worked with the current landlord by providing our proofs and references for the proposed signage, they have granted us approval for our designs for the plaza. In doing so, we still used a font style and color combination of previous guidelines.

Along with landlord approvals, we designed the project to fit within the city's codes presented at 8% the storefront for signage.

We thank you for your time and consideration on this matter.
